-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

Greetings,

This is not the first time I have emailed this address about the currently proposed settlement between Microsoft and the USDoJ. I am wanting to point out that we are listening and watching and that we feel that they are still trying to stifle competition in the computer industry and crush standards that they do not own or developed themselves.

Please take the time to read this article:
<http://www.theregister.co.uk/content/54/23708.html>

Thank you for your time.
